## Series 6 Time Recording Terminals

At hfx, we know that a time recording system is an integral part of your office environment. The hardware that your staff use to record their working hours needs to be stylish, reliable and flexible. The Series 6 range of terminals has been designed to combine all these factors.

## Reader technology

Choose the most appropriate reader type for your organisation based on cost or security features, including:

- Proximity - Motorola, HID iClass etc.
- Smart (Chip) Card - Mifare
- Magnetic Swipe

Depending on the manufacturer, it is also possible in some cases to incorporate your existing readers into the terminals.

## Connectivity

Your time recording and access control system can make use of existing cabling, CAT5 Structured Cabling, IT networks or be configured to best suit your environment

Use these reliable terminals in conjunction with hfx software and reap the following benefits for your organisation:

- Enable staff to obtain information at a glance, such as time balances,
- Monitor events such as overtime and smoking breaks,
- Use standalone or integrated as part of your access control system.

### Nationwide Service and Support

With Service Centres in Hertfordshire, Lancashire and West Lothian, hfx offers an unsurpassed range of access control and time recording products and the support to ensure that you feel the benefits of your investment in our competence.
