

Mobile Access

Easy Mobile Access to empower your flexible working policies

Etarmis Mobile provides an elegant solution for those staff that need to access your workforce management system, while they are out and about, or working from home.

A single interface for all devices

Etarmis Mobile solves the problem of having many different versions of an App, all of which look different on different devices, and may have different attributes because they run on disparate platforms.

Etarmis Mobile is a web site hosted on the Etarmis web server and is compatible with all of the most popular web browsers including:

- IE
- Chrome
- Firefox
- Safari

This means that it will run on most smart phones, tablets and laptops whatever the operating system with no requirement for additional software.

Powerful Self-Service while on the move

Using Etarmis Mobile staff can:

- Access Self-Service features to view their personnel details
- Clock in and out
- Check flexitime and hours worked balances
- Request holidays and other absence
- Managers can approve absence requests from their team members

Low Support and Maintenance overheads

With Etarmis Mobile there is very little maintenance overhead. As there is one centrally managed version, any updates are applied once, to which all users have access. Connection to Etarmis Mobile can either be via the public internet or a VPN secure connection.

Get your company on board with flexible working - Contact hfx today.
